

# NAVJIVAN SCIENCE COLLEGE, DAHOD

Shri Govind Guru University, Godhra

## Certificate Course in Haematology

(Total Hours 30)

### Theory:

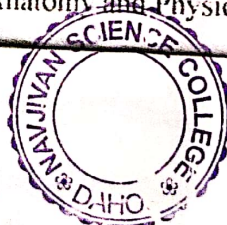

- Properties of Blood: Physical Characteristics of Blood, Composition of Blood- R.B.Cs. W.B.Cs., Platelets and Blood plasma
- Hemopoiesis- formation of blood cells
- Red Blood Cells: RBC anatomy, RBC physiology, RBC life cycle, Erythropoiesis (production of RBCs).
- White Blood Cells: Types of WBCs, Functions of WBCs
- Platelets: Structure, Function and Development
- Blood coagulation and factors involved in coagulation.
- Blood groups: ABO and Rh blood groups
- Blood disorders: Anaemia, Sickle-cell Disease, Thalassemia, Haemophilia, Leukaemia

### List of Practicals:

1. Determination of Bleeding time
2. Determination of Clotting time
3. Preparation of blood smear
4. Preparation of haemin crystals
5. Determination of haemoglobin by hemoglobinometer
6. Determination of RBCs by haemocytometer
7. Determination of WBCs by haemocytometer
8. Osmotic fragility test
9. Blood grouping

### Reference Books:

1. Tortora, G. J.: Principles of Anatomy and Physiology. John Wiley & Sons, Inc.
2. Guyton, A.C and Hall J.E.: Textbook of Medical Physiology. W.B.Saunders Co. Philadelphia.
3. Chatterjee, C.C.: Human Physiology (Vol. I, II, III). Medical & Allied Agency.
4. James A. Wilson: Principles of Anatomy and Physiology. Macmillan Publishing Co.

# Certificate Course in Haematology

Offered by: Navjivan Science College, Dahod (Affiliated to Shri Govind Guru University, Godhra)

Total Hours: 30

## Introduction

Haematology is a vital branch of medical science that deals with the study of blood, its components, and related disorders. This certificate course provides a foundational understanding of blood properties, cell formation, and various physiological and pathological aspects of haematology. The program is designed to equip students with theoretical knowledge and practical skills essential for diagnosing and understanding blood-related conditions.

## Course Objectives

- To understand the physical and chemical properties of blood and its components, including red blood cells (RBCs), white blood cells (WBCs), platelets, and plasma.
- To explore the process of haematopoiesis (blood cell formation) and erythropoiesis (RBC production).
- To study the anatomy, physiology, and life cycle of RBCs, along with various functions of WBCs and platelets.
- To gain insights into blood coagulation mechanisms and the factors influencing clotting.
- To understand different blood group systems (ABO and Rh) and their significance in transfusion medicine.
- To examine common blood disorders such as anaemia, sickle cell disease, thalassemia, haemophilia, and leukaemia.

## Course Structure

### Theory

The theoretical component covers the following key topics:

- **Blood Properties & Composition:** Understanding the physical and biological characteristics of blood and its constituents.
- **Haematopoiesis & Erythropoiesis:** The formation and differentiation of blood cells.
- **Red Blood Cells (RBCs):** Structure, function, life cycle, and physiological roles in oxygen transport.
- **White Blood Cells (WBCs):** Different types and their roles in immunity and defense mechanisms.
- **Platelets & Coagulation:** Structure and function of platelets, blood clotting mechanisms, and coagulation factors.
- **Blood Groups:** ABO and Rh systems and their relevance in transfusion and compatibility testing.
- **Blood Disorders:** Pathophysiology, symptoms, and management of major blood-related diseases.

## Practical Component

Hands-on laboratory sessions provide students with essential skills in haematological analysis. Key practical activities include:

1. **Bleeding Time Determination:** Assessing primary haemostasis and platelet function.
2. **Clotting Time Determination:** Evaluating the blood coagulation process.
3. **Blood Smear Preparation:** Microscopic examination of blood cells.
4. **Haemin Crystal Preparation:** Identification of haemoglobin-derived crystals.
5. **Haemoglobin Estimation:** Using a hemoglobinometer to determine haemoglobin levels.
6. **RBC Counting:** Employing a haemocytometer for red cell count assessment.
7. **WBC Counting:** Estimating white blood cell count using a haemocytometer.
8. **Osmotic Fragility Test:** Assessing RBC membrane integrity under hypotonic conditions.
9. **Blood Grouping:** Identifying ABO and Rh blood groups for transfusion compatibility.

## Career Scope

Upon completion, participants can explore opportunities in diagnostic laboratories, blood banks, hospitals, and research institutions. The course also provides a foundation for further studies in clinical haematology and related fields.

# NAVJIVAN SCIENCE COLLEGE, DAHOD

Conducted by : Dahod Anaj Mahajan Sarvajanic Education Society, Dahod

Affiliated with Shri Govind Guru University, Godhra  
Re-Accredited by NAAC with B grade with a CGPA of 2.31  
Accredited "AAA" B Grade With a CGPA of 2.65

## CERTIFICATE COURSE-IN HEMATOLOGY

Date: 02/01/2025 to 04/02/2025

(30 days, 1hr per Day)

Registration fees Rs. 250/- (Rs. Two Hundred Fifty rupees only).

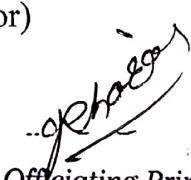

Maximum intake of Students 50 Registration starts: 21/12/2024 to 31/12/2024

Eligible students: Any student from F. Y. to T. Y. will be preferred

Note: Registration forms will be available at the college office starting from 21/12/2024. Alternatively, forms can be downloaded from our college website, www.navjivansciencecollege.com. Completed forms, along with the required fees, must be submitted to the college office on or before 31/12/2024. The detailed course schedule will be announced later. Upon successful completion of the course, all participants will receive a certificate.

For Further Details contact:

- Ms. Dhruvi K. Patel - 9428514383 (Course Coordinator)
- Mr. Ankit N. Chauhan- 7359960826
